IT Report

Proposed Workstation List:

Student workstations:

All student worker and leaving grad student machines have been cleaned.

Faculty/staff workstations:

A standard image for faculty/staff machines has been created. All new machines will be wiped and standard image installed. ALEC recommended machines document created.

Departmental Labs, Classroom Computing, Conference Rooms:

The Curl Lab:

All lab computer, mac and windows, have been cleaned and are ready for the new semester.

Two new workstation setups were ordered and will be installed in the curl lab.

IMS:

All computers updated, moved to ADS, and have Atera installed on them.

Room 132, 255, and 266:

Conference computers are in the process of being wiped.

Room 200 and 129:

These machines belong to the Dean's Office. I have no control over these machines. To log in using the guest account, follow the instructions on the wall. If you cannot locate the instructions, email me and I can help you log in.

Software Updates and User Account Management:

Viewfinity

Should go into effect the week of the 9th.

Splashtop vs. Teamviewer

Teamviewer is still the preferred remote application, however, splashtop is integrated into Atera, making it extremely easy to use with current setup. Teamviewer is supposed to be integrated with Atera "shortly," after that is done splashtop will be removed.
