Help at Guzman's 2N's Ranch

Guzman's 2Ns Ranch is looking for help this spring. They need help with the breeding program assisting with estrus detection, semen collection, and insemination. Students would also be assisting with embryo collections and transfers. About half the population will be managed for receiving shipped semen from other farms. The students will participate in general health care and any other experiences that typically arise in a breeding farm situation. They will have some customer contact. Guzman's 2Ns Ranch is located about 20 miles from A&M.

Interested students should contact Stephen Vogelsang, breeding manager at Guzman's 2Ns Ranch at embryosv@txcyber.com or 979/229-3439.
