Introduction

Welcome

Welcome to the Biological and Agricultural Engineering Department at Texas A&M University! Our department has a long and distinguished history of providing research and educational programs related to the engineering needs of the food and agricultural sciences. We have been consistently rated as one of the premier departments in the United States. Our faculty is well respected and active in various interdisciplinary professional societies, with several faculty members providing leadership in these societies. The Biological and Agricultural Engineering Department places a high priority on graduate education and offers a wide array of research topics. The research programs combine leadership in traditional areas of biological and agricultural engineering with aggressive development of programs in emerging technologies, including environmental and natural resources engineering, food and bioprocess engineering, systems analysis, machine and energy systems, and feed, food, and fiber processing. These programs are also conducted in several Research and Extension Centers located throughout the state.

Our graduate students come from many states and many countries around the world. You are encouraged to communicate with your fellow graduate students in order to benefit from their experience. Graduate students are a vital component of our department. As a graduate student you will gain experience in both the classroom and laboratory, increase the department's research capability, and, most importantly, bring new dimensions to its work. The real strength of our graduate program is the close interaction between graduate student and faculty member. Our faculty is extremely dedicated to the student's professional development and lifetime friendships have been built that span social and national boundaries. We are glad you are joining our team.

Please note that this handbook provides a guide for a student's graduate career in the BAEN department. However, it should not be considered a comprehensive representation of all the rules, policies and procedures that govern graduate studies at Texas A&M University.

Department of Biological and Agricultural Engineering
201 Scoates Hall
Texas A&M University
College Station, Texas 77843-2117
Phone: (979) 845-3931; Fax: (979) 862-3442
baen.tamu.edu

Introduction

This handbook provides information about our graduate programs to new and continuing graduate students in the department. It covers the academic policies concerning the many facets of graduate studies, including degree programs, examinations, and financial assistance. This handbook is not all-inclusive and students must refer to the Texas A&M University Graduate Catalog available on-line at catalog.tamu.edu and the website of the Office of Graduate and Professional Studies at ogaps.tamu.edu. *The Office of Graduate and Professional Studies will be referred to as OGAPS in this document.*

Students should meet with their major professor (also referenced as the Graduate Committee Chair), the Director of Graduate Programs, and the graduate advisor/coordinator. All have experience and information to share and are able to help if students have any questions about their courses or specific problems not covered by this handbook.

Where are we located?

The BAEN Department is located in Scoates Hall. See the Campus map above or get the directions at aggiemap.tamu.edu

You can contact us at:

College Station, TX 77843-2117

By Phone: (979) 845-3931

By E-mail: baen.tamu.edu/

Getting Started

This section describes some general departmental policies and procedures to help students use the facilities and proceed with their degree program.

Admission Requirements

Admission is primarily the responsibility of the department. The BAEN Department requires a 3.0/4.0 GPR or equivalent for admission. International students are required to fulfill an English proficiency requirement which is most commonly met with a minimum score of 146 on the GRE verbal test or a minimum TOEFL score of 80-iBT, 213 computer-based, or 550 paper-based. For details on requirements see <http://admissions.tamu.edu/international/graduate>. If these minimum scores are not met, the international student will not be granted admission to Texas A&M University. The department will not be able to review and consider an application until all required application documents have been received.

The Department of Biological and Agricultural Engineering requires students pursuing an engineering degree program to have a degree from an ABET-accredited engineering program or demonstrate that courses taken in previous academic preparation are equivalent to a BS in engineering. A student pursuing an agriculture degree must have a BS or equivalent in a recognized program.

Admission Procedures

Students must complete all required admission forms, which include a statement of purpose and letters of reference. Graduate admissions information is available at the Texas A&M University Office of Admissions website, <http://admissions.tamu.edu/graduate/apply>. Please keep in mind that all admission applications must be submitted via EngineeringCAS. Visit <https://baen.tamu.edu/academics/graduates/graduate-admissions/> for more details.

Admission applications to a degree program are evaluated by the BAEN Graduate Program Committee appointed by the Department Head. The chair of the Graduate Program Committee serves as the Director of Graduate Programs and is appointed by the Department Head. The committee uses a student information database (compiled by EngineeringCAS) to evaluate new applicants. Information found in the database includes: (1) GRE scores, (2) TOEFL scores, (3) Area of interest, (4) GPA, (5) Statement of Purpose, (6) Previous degrees and schools, (7) Starting semester, (8) Level of study applying for (degree sought), (9) Official Admission Records (OAR), (10) Application, (11) Recommendations, (12) Resume, (13) Major Professor, and (14) Academic Transcripts.

Introduction

The committee members evaluate student applications using the information in the above database and approve or deny the admission (by voting). Based on the outcome of the vote, the Director of Graduate Programs will sign acceptance or denial decisions electronically (via EngineeringCAS). The admissions office will then send out acceptance and denial letters to applicants. The department may also issue an admissions letter that contains specific information and conditions pertinent to the admissions process.

****Beginning Summer 2020, domestic students will no longer be required to submit official GRE scores for departmental admission. International students must still submit scores to EngineeringCAS for English Language Verification.****

A student will not be admitted for graduate study without a faculty member having agreed to serve as his/her major professor. Applications with GPA/GPR < 3.0 that do not have a major professor identified will be automatically denied.

In limited instances, the committee may decide to admit students conditionally. In such instances the student will have to take appropriate action(s) to remove the *conditional* status as per stipulations imposed during the admissions process.

Removal of Conditional Admit status would be done as follows:

- **Conditional Admission with coursework levelling requirement(s):** The student will be admitted to the graduate degree program once all the levelling coursework has been completed with a grade of B or better.
- **Conditional Admission without GRE scores:** The BAEN Department requires GRE scores for final admissions decisions. In limited instances, as determined by the Department Head or the Director of Graduate Programs, the department may allow processing of an application pending GRE scores (for conditional admission). The student should present GRE scores to the BAEN Graduate Program committee who will decide on the final admission status.
- **Conditional Admission based on low entrance Grade Point Average/Ratio:** The student should achieve a cumulative GPR of 3.0 or better based on the courses he/she takes during the first semester. The student will have to register for a minimum of six credit hours that carry grades (i.e., excluding courses that carry S/U or I grades).
- **Any other conditional admission clause imposed by the Graduate Committee or the Director of Graduate Programs:** Evidence should be submitted to the Director of Graduate Programs (who will decide to put the file to the Graduate Committee for voting or make an admissions decision himself/herself based on the nature of the requirement(s)).

Introduction

If a student does not fulfill any of the requirements stipulated when admitted conditionally, he/she will be placed on academic probation (see section on Scholastic Deficiency).

Whom to ask for Help?

In most cases, your major professor, the graduate advisor/coordinator or Director of Graduate Programs will be able to help. A list of all staff members who can assist you is provided in BAEN webpage under personnel.

Your Major Professor

This is the faculty member who, during the acceptance process, committed to serve as the chair of your graduate advisory committee. After arrival, students should meet with their major professor and can consult with other faculty members to become acquainted with their research areas. A student may request reassignment if it seems appropriate to all parties, usually no later than the first semester upon arrival.

Under no circumstances will a graduate student be allowed to remain in the BAEN Department graduate program if s(he) does not have a graduate advisor (major professor).

Should a student select an off-campus professor to be his/her Graduate Committee Chair/Major Professor, the student and professor must identify an on-campus Co-Chair by the time of arrival at the College Station campus for the entry semester.

Assignment of Graduate Office Space and Mailbox

The BAEN graduate advisor will assign office space/desk to graduate students depending on the availability of space. Students are responsible for keeping their area clean. Any special needs for office and desk space should be initiated by the student's major professor. Graduate students are assigned office space either at Scoates Hall (SCTS) or at the West Campus complex.

Introduction

All graduate students will be assigned a mailbox. The address for receiving mail is:

**Texas A&M University
Biological & Agricultural Engineering Department
Scoates Hall
2117 TAMU
College Station, TX 77843-2117**

Keys

Office, building, lab, and desk keys can be obtained in the department main office, Room 201 Scoates Hall. Your major professor will determine which keys you will be provided and will need to sign the key request form before keys can be issued to you. A one-time security cash deposit is required for keys issued. The deposit will be refunded by check when all keys are returned.

Photo Copy Machines and Office Supplies

Office supplies are available for students performing work for the department. Students should make a request through their major professor. The staff is not permitted to do typing of a personal nature for students. This includes course work, theses, dissertations, and degree plans. Students must also have an access number to charge any photocopies made on the copy machines. This code is obtained through their major professor or faculty with whom they are currently working.

Use of Computers

The department maintains computers and facilities for Biological and Agricultural Engineering faculty, staff, and students. There are computer rooms, located in Rooms 213 and 214 of Scoates Hall and Room 118 in Hobgood (West Campus Complex). Room 214 is primarily an undergraduate student lab and Room 213 is a graduate lab. Access to the rooms is with an ID Card only. The department utilizes e-mail to distribute information and to communicate regularly. Students are responsible for the actions of anyone they let in to use the facilities after hours and should always be sure the door is locked after normal operating hours.

Note: Computer access is not automatic and comes with responsibility. The penalties are loss of computer privileges and any legal consequences that may result from violating the policies.

Faculty/Staff/Students Lounge

Students are welcome to use the facilities in Rooms 230 – Graduate Lounge. This lounge contains a microwave and refrigerator for graduate student use. If you choose to consume coffee in the staff lounge, see the business office to make your donation/contribution to the departmental coffee fund. Everyone is responsible for cleaning up after himself or herself in the area.

Shop

Excellent shop facilities are available at our West Campus location for constructing research apparatus. Graduate students must obtain the permission of the shop coordinator to use the shop. Students must demonstrate to the shop coordinator their ability to safely use any of the shop equipment before permission is granted.

The shop personnel can assist in constructing research apparatus. Plans (including detailed drawings) and a work order should be submitted to the shop coordinator. The shop work order must be approved by the student's work supervisor or major professor prior to submittal. A detailed description of shop procedures and safety guidelines is available from the shop coordinator.

Use of Departmental Vehicles

Departmental vehicles may be used by students who are employed by the department and who are working on departmental projects. Proof of a current U.S. driver's license is required to use departmental vehicles. Drivers' licenses are available through the Texas Department of Public Safety. Approval of the major professor or work supervisor, as well as an account number to which the expenses may be charged, are required prior to vehicle use.

Purchase Orders

You will not need to use personal funds for research or teaching purchases. Purchase orders are like checks written against the funds in an account. Purchase order numbers must be obtained from the Business Office prior to making any purchase. Purchase order request can be made by sending an email to baen-business@tamu.edu. In the request, include the vendor, estimated amount, items being purchased and the account number to be charged. All receipts must be signed, dated, and returned to the Business office as soon as possible after the purchase. Also, turn in any packing slips that are received. The student's supervisor should provide an account number and project number to which the purchase should be charged. Our business personnel can provide guidance and assistance in all fiscal matters. Your professor may also have a purchasing card that you could use. See him or her about the availability and procedures that must be followed.

Travel Procedures

If you will be traveling with the Biological and Agricultural Engineering Department, please use the following procedures as a guide.

1. If you will travel on official business you will need to first complete the following:
 - a. Travel Authorization Request. This is for all business travel, whether you will be requesting a reimbursement or not, and must be filled out in Concur (travel management software) prior to taking the trip. Please see the Travel Coordinator for the department to obtain assistance.
 - b. Travel Certification/Exemption Form. This is necessary if you will be using a rental car and lodging. Please see the Travel Coordinator for the department.
 - c. Get the account name and project numbers from your advisor if being reimbursed for any travel expenses. You must have approval from your advisor prior to traveling.
2. Our department has a business departmental agency travel credit card to pre-purchase airline tickets. You cannot use your own charge card (VISA, MasterCard, or American Express) to purchase airline tickets if using a state account; if you do, you will not be reimbursed for your airline ticket. Please see the Travel Coordinator for assistance to make reservations.
3. Our department has the ability to prepay conference/seminar registration fees. The Travel Authorization Request and the registration form must be completed and received, in our departmental travel office, no later than 30 days prior to the date that the company/organization needs to receive the fees. Please keep your registration confirmation or get a receipt at the conference, you will need to turn this in to the Biological and Agricultural Engineering travel coordinator.
4. The University has numerous lodging accommodations that have been contracted by the State of Texas. Reservations can be made through Concur. The Travel Coordinator can assist you with the making the reservations. You will need to pay for the expenses using your own credit card then get reimbursed after your trip is complete. Please make sure you keep your hotel receipt(s) and do not mark on them in any way. If two or more travelers will be sharing lodging the room receipt must be separate and each traveler must have his/her own receipt. If you are traveling in the State of Texas, make sure the receipt shows the State tax exemption.
5. The University has contracted with AVIS and Enterprise for rental car use. Reservations can be made through Concur. The Travel Coordinator can assist you with making the reservations. You will need to pay for the expenses using your own credit card then get reimbursed after your trip is complete. Please keep your receipt and make sure that you take a copy of the Exemption Form with you when you pick up the vehicle.
6. After travel has been completed it will be your responsibility to provide Travel Coordinator all documentation necessary if a reimbursement is anticipated. Please turn in your receipts and daily itinerary with the information below to the Travel Coordinator.
 - a. Traveler's Name.
 - b. Title.
 - c. Date and time that you left headquarters.
 - d. Date and time that you returned to headquarters.
 - e. Record of Transportation and Duties Performed. Be sure to show how this travel is a benefit to the department, university and/or research project.

Introduction

- f. Account name and project numbers from your advisor.
- g. The Travel Coordinator will assist you with completing the travel voucher in Concur for your reimbursement.

If you have any questions, please contact the Travel Coordinator. Do not wait until after the travel is complete.

Employment Status

You will be sent to the departmental business offices to fill out the paperwork associated with your employment status. If a student's employment status changes (e.g. from Research Assistant (RA) to Teaching Assistant (TA)), the department's Business Manager should be notified. Failure to do so may result in a late paycheck.

Parking on Campus

As a student, you can purchase a parking permit in a student-designated lot at the time you register for classes.

The university shuttle is also available both for on and off campus transportation of students. Transit routes for both on and off-campus can be found at <http://transport.tamu.edu/BusRoutes/>, or at 979-862-7275 (parking) or 979-847-7433 (bus operations).

Use of State Property

It is against State Law in Texas to use any state-owned property for personal use.

Payment of Tuition Fees

Information including cost per scheduled hour, tuition and fee calculator, payment due dates and more can be found at the Student Business Services website at:

<https://sbs.tamu.edu/index.html>

Requirements and Guidelines

All graduate students should review the following publications:

1. The Office of Graduate and Professional Studies:
<http://ogaps.tamu.edu>
2. The Texas A&M Graduate Catalog:
<http://catalog.tamu.edu>
3. The University's Student Rules Handbook:
<http://student-rules.tamu.edu>
4. The Texas A&M University Thesis Office:
<http://ogaps.tamu.edu/New-Current-Students/Thesis-and-Dissertation-Services>
5. Resources for Degree Completion:
<http://ogaps.tamu.edu/Buttons/Resources-for-Degree-Completion>

All students must follow the guidelines and meet the requirements as given in these documents. The Department has additional requirements that all students must fulfill to earn a graduate degree in Biological and Agricultural Engineering at Texas A&M University. Requirements for the various degrees in Biological & Agricultural Engineering, including both University and Departmental requirements, are listed next/below. Details on the University requirements can be found in the documents listed previously/above. Note that some of the **Departmental deadlines are earlier than the University deadlines.**

What to Do and When

Masters Students:

When	What
Before first semester registration	Meet with major professor to plan course of study for first semester
Before second semester registration	Establish Advisory Committee
Early in second semester	Submit Degree Plan on-line at https://ogsdpss.tamu.edu/
Prior to initiating thesis research	Develop draft of proposal in conjunction with major professor and graduate committee members (only for M.S. students)
	Submit final research proposal to OGAPS
During final semester	Apply for degree
	Pay diploma fee
	Schedule final oral examination
	Submit thesis on-line
	Apply for graduation (http://graduation.tamu.edu)

Doctoral Students:

When	What
Before first semester registration	Meet with major professor to plan course of study for first semester
Before third semester registration	Establish Advisory Committee
Early in fourth semester	Submit Degree Plan on-line at https://ogsdpss.tamu.edu/ . The department of Biological and Agricultural Engineering requires a 90 day wait period between having a degree plan on file and completing the preliminary examination.
No later than one semester after all course work is completed, and no earlier than date at which student is within 6 credit hours of completing formal course work	Schedule and take preliminary examinations (written and oral). A dissertation proposal should be submitted along with the preliminary examination. The department of Biological and Agricultural Engineering requires a 14 week waiting period between completion of the preliminary examination and taking the final examination.
Prior to initiating dissertation research	Develop draft of research proposal in conjunction with major professor and graduate committee members
	Submit final research proposal to OGAPS
During final semester	Apply for degree
	Pay diploma fee
	Schedule and take final oral examination
	Submit dissertation on-line
	Apply for graduation (http://graduation.tamu.edu)

This information is subject to change; please visit following website for more up-to-date information:

<http://ogaps.tamu.edu/Buttons/Resources-for-Degree-Completion>

Graduate Committee Selection

Students will select the other committee members in consultation with their committee chair. All Biological & Agricultural Engineering Department faculty members who hold a Ph.D. degree (this includes tenured/tenure-track/and Agency appointments) are eligible to serve as chair, co-chair, and member of BAEN graduate student committees.

When a BAEN off-campus faculty member serves as chair, an on-campus BAEN faculty member will be appointed as co-chair. This practice is intended to best serve the interests of the students.

Faculty and professional staff employed by other institutions and organizations can serve as graduate committee special appointments.

Students should contact each prospective committee member, have an interview with him/her and ask him/her to be a member of their committee. The student should review the proposed degree plan with the prospective member. The committee member's electronic approval of the degree plan indicates his/her willingness to participate in guiding and directing the student's entire academic program. Individual committee members may be replaced by petition for valid reasons. Both degree plans and petitions are submitted on-line at the OGAPS website.

Degree	Committee Members	Affiliation
Masters	3	2 from BAEN (including Chair), 1 from outside BAEN
Doctoral	Minimum of 4	2 from BAEN (including Chair), at least 1 from outside BAEN

Committee Responsibilities

The student's advisory committee has responsibility for assessing the appropriateness of the proposed degree program, the research proposal, the thesis and the final examination. In addition, the committee is expected to provide periodic advice and assistance to the graduate student. At the doctoral level, the committee also has the responsibility for the Ph.D. preliminary examination and the qualifying examination for the Doctor of Engineering.

Graduate Committee Chair's Responsibilities:

1. Responsibility for the guidance, training, evaluation, supervision and general arrangements for the graduate student.
2. Conduct regularly scheduled conferences with each student at least every semester. Weekly conferences are normal as the graduate student becomes active in his/her research or project.
3. Acquaint the student with departmental policies and provide personal counseling.
4. Arrange resources for the graduate student's research and see that the student has a valid safety checklist for that area.
5. Check and approve all necessary graduate forms and requests for materials, travel and service.
6. Assist the student in preparing a degree plan and research proposal.
7. Evaluate the graduate student's performance on a regular basis and convey the results of the evaluation to the student.
8. After the student has arranged an appropriate schedule, submit the announcement of the final examination to the OGAPS and graduate committee members.
9. After the student has arranged an appropriate schedule, submit the schedule for the preliminary examination for Ph.D. candidates and the qualifying examination for Doctor of Engineering candidates to the OGAPS and graduate committee members.
10. Direct the administration of the preliminary examination, qualifying examination and final examination and report the results of the examinations to OGAPS.
11. Make an initial approval of the record of study, thesis, or dissertation and decide when it is satisfactory for graduate committee action.

Graduate Student's Responsibilities:

1. Register for the appropriate courses and the proper number of credit hours for each semester and summer term (See Course Requirements).
2. Complete all courses on the degree plan satisfactorily (maintain an overall grade point ratio of 3.0 or higher; 3.25 for Doctor of Engineering students) (See Scholastic Deficiency). Graduate students are expected to make a B or better in all courses.
3. Develop the objectives for his/her program and provide the initiative to accomplish these objectives.
4. Select members of the graduate committee.

Requirements and Guidelines

5. Prepare and submit the degree plan to OGAPS.
6. Develop a research proposal in consultation with the graduate committee chair and the graduate committee and submit the proposal to OGAPS.
7. Prepare and submit a high-quality record of study, thesis or dissertation.
8. Present a departmental seminar on thesis, dissertation, or internship report.
9. Schedule with committee members the final, preliminary and qualifying examinations. Provide a schedule to the graduate committee chair so that he/she can send an announcement of the examination to OGAPS.
10. Develop manuscript(s) (minimum 1 for M.S.; 2 for Ph.D.) for publication in peer-reviewed journals to communicate research results to the pertinent literature.

Goals of Graduate Education in Biological & Agricultural Engineering at Texas A&M University

1. General

- To explore the use of science and technology in problem solving for the benefit of society
- To further career opportunities
- To participate in the process of continuous education
- To develop and enhance professionalism
- To develop leadership and management skill
- To develop communication skills, written and oral
- To develop self-discipline and self-educating capabilities

2. At the Masters Level

- To develop the capability to plan, conduct, and document research in accordance with accepted scientific methodology
- To learn to function as a member of a team or organization
- To prepare for the pursuit of further specialization or advanced degree
- To communicating research results orally and in the pertinent literature

3. At the Doctoral Level

- To develop the capability to conduct independent research by writing proposals, planning research, conducting research, administering projects, managing support personnel, and communicating research results orally and in the pertinent literature
- To develop teaching skills through formal study of pedagogical methods, supervised classroom teaching experience, and fostering a positive attitude towards teaching
- To develop a high level of expertise in a particular subject area
- To develop new knowledge

COURSE REQUIREMENTS FOR THE DEGREE

Courses to be included on a student's degree plan are selected as a joint effort between the student and his/her graduate committee. The student's graduate committee and the BAEN department head must approve all degree plans.

All graduate students receiving assistantships are required to register as full time students —9 credit hours during the fall and spring semesters; 6 in summer (3 in each summer session or 6 for the 10-week session). Those on financial assistance through TAMU Scholarships and Financial aid and other sources (e.g. fellowships, sponsorships, etc) must check with relevant entities to obtain registration guidelines.

Students not receiving financial assistance who have completed all course work are required to be in **continuous registration** until all requirements for the degree have been completed by registering for a minimum of one credit hour for fall and spring semesters and the 10-week summer session.

International students must also comply with registration requirements according to their visa status.

1. Master of Science Degree (BAEN)

A. A minimum of 30 credit hours distributed as follows:

*Note: student entering Texas A&M University beginning Fall 2019 will be on a **30** credit hour degree program. See additional notes below.*

1. A minimum of 24 course credit hours
2. A maximum of 6 research credit hours (BAEN 691)

note: students entering Texas A&M University beginning Fall 2019 are required to take no more than 6 hours of research credit

3. BAEN 681 (Graduate Seminar)
4. BAEN 690 (Theory of Research)
5. BAEN 683 (Peer-Review Process and Publication)
6. A minimum of 6 credits of formal course work at the 600 level Biological & Agricultural Engineering Courses (in addition to all 684, 685, 690, 683, and 691 credits)
7. A maximum of 6 BAEN 685 and 689 credits
 - A. Student must specify which class they are taking - not just 689 Special Topics
 - B. Must be formally offered course work, special problems or special studies
 - C. May exceed maximum 6 credits with departmental approval.
8. A maximum of 9 hours of advanced undergraduate course (300 or 400-level)

None of the BAEN required undergraduate courses can be used on a graduate degree plan (only the electives).

9. One 600 level mathematics course (MATH 601 or equivalent). Classes approved for BAEN are:
 - a. MATH 601 - Methods of Applied Mathematics I (Linear Algebra)
 - b. MATH 609 - Numerical Analysis
 - c. MATH 611 - Introduction to Ordinary and Partial Differential Equations
 - d. MATH 612 - Partial Differential Equations
 - e. MATH 647 - Mathematical Modeling
 - f. MATH 664 - Seminar in Applied Mathematics
 - g. CHEN 604 - Chemical Engineering Process Analysis I
 - h. ECEN 601 - Linear Network Analysis
10. One 600 level statistics or equivalent (minimum of 3 hrs). Class approved for BAEN are:
 - a. STAT - any 600 level
 - b. BAEN 661 - Experimental Methods in Biological and Agricultural Engineering
 - c. BAEN 662 - Statistical Methods in Biological and Agricultural Engineering

11. A maximum of 12 transfer credits

These requirements will be followed unless advisor can make strong logical arguments to the Department Head towards minor exceptions.

The graduate student's committee must be formed early in the student's program and the committee review and approve the degree plan as early as possible in the student's program. The degree plan must be signed by all members of the committee before the plan is reviewed by the Department Head. The degree plans should be submitted in the system at least two weeks before they are due, to allow enough time for them to be studied thoroughly.

B. A final oral examination over the written thesis.

2. Master of Engineering Degree (BAEN)

A. A minimum of 30 credit hours to be distributed as follows:

1. A maximum of 6 credit hours of BAEN 684 (Professional Internship – see more information in the Professional Internship section). Three hours of BAEN 684 (internship) are a requirement for a Master of Engineering in Biological and Agricultural Engineering.
2. A maximum of 6 credit hours of BAEN 685 (Special Problems)
3. BAEN-681 (Graduate Seminar)
4. Any combination of 684 and 685, may not exceed 25% of the total hour requirement
5. One 600 level mathematics course (MATH 601 or equivalent) – See approved list under Master of Science Degree
6. A maximum of 9 hours of advanced undergraduate course (300 or 400-level)
7. A minimum of 6 credits of formal course work at the 600 level Biological & Agricultural Engr Courses (in addition to all 684 and 685, and 681 credits)

8. No credit hours of BAEN 691 (Research) may be used
- B. A final oral examination over the written report is required.

None of the BAEN required undergraduate courses can be used on a graduate degree plan (only the electives).

3. Master of Science Degree (AGSM) - Thesis Option

Thesis-Option Degree Plan Requirement

- A. A minimum of 32 credit hours distributed as follows:
1. A minimum of 24 course credit hours
 2. A maximum of 8 research credit hours (BAEN 691)
 3. BAEN 601-Advanced Agricultural Systems Analysis (3 hours)
 4. BAEN 681-Seminar (1 hour)
 5. BAEN 683-Peer Review Process and Publication (1 hour)
 6. BAEN 690-Theory of Research (1 hour)
 7. STAT 651 - Statistics in Research I (or other advisory committee approved equivalent 3 credit hour 600-level Statistics course; i.e. BAEN 661, 662)
 8. Minimum of 6 credit hours of BAEN 6xx-level courses (in addition to 681, 683, 690, 691)
 9. Maximum of 6 credit hours of BAEN 685 and 689 credits (specific 689 class must be indicated)
 10. Maximum of 9 credit hours of advanced undergraduate 300-400 level courses

None of the AGSM required undergraduate courses can be used on a graduate degree plan (only the electives).

11. Maximum of 12 transfer credit hours
- B. A final oral examination over the written thesis.

4. Master of Science Degree (AGSM) - Non-Thesis Option

Non-Thesis Option Degree Plan Requirements

Minimum of 36 credit hours distributed as follows:

1. BAEN 60I - Advanced Agricultural Systems Analysis (3 hours)
2. BAEN 681 - Graduate Seminar (1 hour)
3. Minimum of 9 credit hours of BAEN 6xx-level courses (in addition to 681)
4. Maximum of 9 credit hours of BAEN 685 and 689
5. Maximum of 9 credit hours of advanced undergraduate 300-400 level courses

None of the AGSM required undergraduate courses can be used on a graduate degree plan (only the electives).

6. No credit hours of BAEN 691
7. Maximum of 12 transfer credit hours

5. Master of Agriculture Degree (AGSM)

A. A minimum of 36 credit hours to be distributed as follows:

1. A maximum of 8 credit hours of BAEN 684 (Professional Internship)
2. A maximum of 8 credit hours of BAEN 685 (Special Problems)
3. BAEN-681 (Graduate Seminar)
4. Any combination of 684, 685, 683, and 690 may not exceed 25% of the total hour requirement
5. A maximum of 18 credit hours on courses outside of the degree option
6. A maximum of 9 hours of advanced undergraduate course (300 or 400-level)
7. No credit hours of BAEN 691 (Research) may be used

B. A final oral examination over the written report is required

6. Doctor of Philosophy (Ph.D.) Degree

The Doctor of Philosophy degree is a research-oriented degree requiring a minimum of: 64 credit hours of approved courses and research beyond the Master of Science degree or 96-semester credit hours beyond the baccalaureate degree.

A. Credit hours in the degree plan should be distributed as follows:

1. A maximum of 40 research credit hours (60 for student enrolling into a PhD program directly from a BS)
2. A minimum of 24 course credit hours (minimum of 36 hours for a student enrolling into a PhD program directly from a BS)
 - BAEN 681 (Graduate Seminar)
 - BAEN 690 (Theory of Research)
 - BAEN 683 (Peer-Review Process and Publication)
3. A minimum of 6 credits of formal course work at the 600 level Biological & Agricultural Engineering Courses (in addition to all 684, 683, 685, 690 and 691 credits and in addition to any 600 level courses earned at the M.S. level in this department)
4. A maximum of 3 credits hours of BAEN 685
5. One 600 level mathematics course (see acceptable courses under MS degree)
6. One 600 level statistics course (STAT 601) or equivalent

Students who have already fulfilled above mathematics and statistics requirements with a grade B or better during a MS degree do not have to take additional mathematics and statistics courses unless as advised by the student advisory committee.

B. Successful completion of a preliminary examination, both written and oral, prepared and administered by the student's Advisory Committee

C. A defense of the Dissertation

D. A dissertation, approved by the student's Advisory Committee, based on the research conducted as part of the graduate program Students not holding an M.S. degree in engineering will be required to take additional collateral courses in the Biological & Agricultural Engineering curriculum at the 400 level or below as specified by the department.

Students who obtained their Master degree at the BAEN department will have to re-take BAEN-681 and BAEN-683 as a requirement for their PhD degree.

7. Doctor of Engineering Degree

<http://engineering.tamu.edu/media/42918/doemanual.pdf>

Interested students are referred to the website above to learn of the specific requirements for admission and program completion.

A condensed version of degree requirements could be found in **Appendix A.**

A condensed version of degree requirements could be found in **Appendix A.**

8. Department Head Approval

The BAEN Department Head (DH) intends to follow the spirit of the requirements in the student manual, but will make exceptions to the requirements if good arguments are made to justify the changes. If the degree plan does not meet the requirement, then the student's major advisor should write and sign a memo to the DH to justify the variation(s). The graduate student's committee must be formed early in the student's program and the committee review and approve the degree plan as early as possible in the student's program. The degree plan must be signed by all members of the committee before the plan is reviewed by the Department Head. The degree plans should be sent to the DH two weeks before they are due, to allow enough time for them to be studied thoroughly.

A list of the steps and/or forms that the DH must approve are given below:

Note: this list is not comprehensive but gives a list of the most common items which need DH approval

- Degree plan
- Request and announcement of final examination
- Thesis/Dissertation Approval Form

Professional Internship

In those programs in which a professional internship is used, a student will spend an appropriate period of time under the supervision of a practicing professional in industry, business, an educational institution or a government agency. The objectives of the internship are two-fold:

1. to enable the student to demonstrate the ability to apply technical training and knowledge by making an identifiable contribution in an area of practical concern to the industry or organization in which the internship is served, and
2. to enable the student to function in a non-academic environment in a position in which he or she will become aware of the organizational approach to problems in addition to those traditional approaches with which the student is familiar.

Internship agreements should be negotiated between the appropriate organization or industry and the department. The organization of the internship, the internship supervisor and the nature of the internship will be determined by mutual consent of the student, the head of the student's major department, the chair of the student's advisory committee, the student's advisory committee and the supervising organization prior to the commencement of the internship period. The internship experience should be at a level commensurate with the particular degree objective.

The student should complete the Internship Documentation Form, obtain appropriate signatures and hand over the completed form to the BAEN Graduate Advising Office prior to beginning of the internship duties. A sample form could be found in the **Appendix B**. An updated form could be obtained by BAEN Graduate Advising Office.

It is the student's responsibility to find an internship that fits both his/her professional aspirations and degree requirements. One credit hour of BAEN 684 Professional Internship is estimated to be one month of full time employment (or as agreed upon by the student graduate advisory committee). Once completed, the student should provide a letter to the Student Advisory Committee with information on the location, duration and the nature of duties performed signed by an authorized official at which the internship took place.

Additionally, an internship report should be prepared by the student in accordance with guidelines established by the department, and/or the student's advisory committee. In general, the report should be submitted to the advisory committee. The internship report must be the original work of the student.

An internship, if utilized as part of a student's degree requirements, should be undertaken near the end of the student's educational program, after the student has had the opportunity to establish a solid theoretical base for the internship experience.

Registration Requirements Based Upon Level of Financial Support

Level of Financial Support	Registration Requirements
½ time employment (including all teaching, non-teaching, research, and Extension assistants, plus any 1/2time hourly wage students)	9 credit hours for each full semester and 3 credit hours for each five-week summer term or 6 credit hours for the ten-week summer session.

Q-Drop Policy

Texas A&M University allows courses to be dropped after the official Drop/Add deadline using Q-Drop procedures. A Q-Drop allows the student to drop a course during the semester without academic penalty. Q-drop forms can be obtained from the academic advisor, and must be initialed by the student's graduate committee chair. Students must keep in mind that dropping below full time enrollment can impact assistantships, fellowship, scholarships, international status, etc. Graduate students should be discouraged from Q-drops whenever possible.

Scholastic Deficiency

A student will be placed on scholastic probation for any of the below reasons:

- if the student's cumulative grade point average (GPA) for the courses on the approved degree plan is below 3.0 at the end of a semester
- if the student's cumulative grade point average for the term is below 3.0 at the end of the semester
- if the student fails to show acceptable proficiency in other degree requirements such as examinations, research, writing the thesis or dissertation, etc.

A communication will be received by the student stating that he/she has not met the requirements and that he/she has one semester to improve. If the student is on an assistantship, funding will be suspended.

The student has one semester to make up the total deficiency. If the student is successful, he/she will be taken off probation. An email/letter from the Director of Graduate Programs will be placed in student file that the conditional admit status has been removed.

If the student fails to meet the requirements, he or she may be subjected to one of the following actions initiated by a recommendation from the student's major professor: permitted to continue in the program on scholastic probation for one additional semester or suspended from the program. At the conclusion of the second semester under probation, if the student has not been able remedy the deficiencies he/she will be force dropped from classes and a hold will be placed preventing him/her from re-enrolling and the student will

be terminated from the program. At that time, a letter of dismissal will be issued and placed in the student's file. It should also be noted that scholastic deficiency may cause the student to be suspended from the university (See section 12.5 in Student Rules and Regulations).

Annual PhD Student Progress Evaluation

Doctoral students are required to complete the Annual PhD Student Progress Form each year in consultation with the student's major professor. Such an evaluation is done to ensure that both the student and the major professor are aware of the student's progress toward timely completion of the Ph.D. program while also allowing the student to plan the upcoming year and address any pertinent issues. Failure to complete the evaluation will result in an academic hold being placed on the student's file which will prevent registration in future terms. A sample form can be found in Appendix C.

Examinations

Complete information can be found in the Texas A&M University Catalog.

Final Examination

All degree candidates must pass a final examination. Deadline dates are announced each semester by OGAPS. At the time of the final examination, the student must have an overall GPA of at least 3.0. Furthermore, there must be no unresolved grades of D, F or U for any course listed on the student's degree plan. An announcement of the final examination will be made by the student's graduate committee chair at least two weeks before the scheduled examination date. A student must have completed all course work on his/her degree program with the exception of any remaining 691 (Research) hours. The student must be registered at the time of the examination. M.S. and Ph.D. degree candidates must have approved research proposals on file with OGAPS before they can take the final examination.

The thesis, report, or dissertation shall be distributed to the student's graduate committee at least two weeks before the final examination. The final examination is a defense of the student's research. However, committee members are free to examine the student on any subject, such as all course work listed on the degree program. At the opinion of the student's graduate committee, the final examination may be written or oral or both. If a student fails the final examination, the student will be given the opportunity to repeat the examination before the end of the next semester (summer terms excluded). Final examinations must be administered on the campus of Texas A&M University at College Station.

The department of Biological and Agricultural Engineering requires a 14-week waiting period between completion of the preliminary examination and taking the final examination.

Preliminary Examinations for Ph.D. Students

The preliminary examination shall be given no later than the end of the first semester after completion of course work and no earlier than a date at which the student is within approximately 6 credit hours of completion of the formal course work on the degree plan. No student may be given the preliminary examination unless his/her official GPA is 3.0 or higher. The examination shall be both written and oral. The written part will cover each field of study included in the student's program of study. Each of the student's graduate committee members will be responsible for administering a written examination in the member's particular field. The BAEN department requires all departmental committee

members to give a written preliminary examination. Non-BAEN committee members may choose to waive participation in the written examination.

The student should meet with his/her committee members and arrange for mutually acceptable dates for both the written and oral exams. Normally each written exam requires one day and the oral examination is completed within three hours. Both the oral and written portions of the preliminary examinations must be administered on the campus of Texas A&M University at College Station. Both parts (written and oral) of the preliminary examination should be completed within a period of two weeks.

The graduate committee chair will submit the Report of the Preliminary Examination to OGAPS. After passing the preliminary examination, the student must complete all remaining requirements for the degree within four calendar years. Otherwise, the student will be required to repeat the preliminary examination. A student who fails the preliminary examination may be given one re-examination, but only after a period of six months has elapsed. A student must be registered in any semester that he/she takes the preliminary examination.

A dissertation proposal should be submitted along with the preliminary examination report.

The department of Biological and Agricultural Engineering requires a 90-day wait period between having a degree plan on file and completing the preliminary examination.

Theses, Dissertations and Records of Study

Complete information can be found in the Texas A&M University Thesis Manual.

1. Master of Science Thesis

A final draft of the thesis must be submitted to the graduate committee at least two weeks before the final examination. After the final examination, corrections shall be made to the thesis prior to submitting it to the Thesis Clerk. All OGAPS requirements must be met before the thesis will be formally accepted by the library. Guidelines for electronic submission are found at <http://thesis.tamu.edu>. A bound copy of the final thesis should also be given to the student's Advisory Committee.

2. Master of Engineering Report

1. The final copy of the Master of Engineering Report (either intern or special problem) must be typed in an acceptable technical journal format. Final draft copies of the report must be made available to the student's Advisory Committee at the time the final examination is announced (at least two weeks prior to the examination).
2. Results of the final examination will not be reported to the Office of Graduate Studies until all corrections to the report have been made.
3. A copy of the final M.E. report shall be distributed to the student's Advisory Committee.

3. Master of Agriculture Report

The Master of Agriculture report (either intern or special problem) must meet all the criteria outlined above for the Master of Engineering report.

4. Doctor of Philosophy Dissertation

A dissertation in final draft form must be submitted to the graduate committee at least two weeks before the final examination. After the final examination, corrections to the dissertation must be made prior to submitting it to the Thesis Clerk. All requirements of the Office of Graduate Studies must be met before the dissertation will be formally accepted by the library. Guidelines for electronic submission are found at <http://thesis.tamu.edu>. A

bound copy of the final dissertation should also be given to each member of the student's Advisory Committee.

Students are expected to submit evidence that two papers have been submitted for publication or published in a peer-reviewed journal to the Department Head (by providing the submission acknowledgement(s) from the journal(s), or via filling the Manuscript Tracking Form with the student's major professor's signature) when submitting Written Dissertation Approval Form for signature.

A sample Manuscript Tracking Form could be found under Appendix D.

Financial Assistance

The department may provide financial support in the form of assistantships. Graduate assistants are selected based on previous academic performance, their ability for handling work assignments with excellence, and their potential for future performance in these areas. Positions are available only to graduate students who are actively pursuing graduate degree programs and who are making satisfactory progress toward their degrees.

The funds come from a variety of sources and the budget varies from year to year. Four types of assistantships are awarded by the department: (1) Graduate Assistant Teaching (GAT), (2) Graduate Assistant Non-Teaching (GANT), (3) Graduate Assistant Research (GAR), and (4) Extension Assistantships.

Ph.D. students should be aware that financial support in the form of an assistantship will be terminated if they have enrolled in more than 100 credit hours without graduating.

Teaching Assistantships

Teaching assistantships are awarded by the department head in consultation with the faculty. They are awarded on a semester-by-semester basis. Teaching assignments are made based upon teaching needs and the expertise of the student. It is desirable for each Ph.D. student in the department to spend at least one semester as a teaching assistant to gain experience. However, many factors such as the number of students, availability of funds, teaching needs and student expertise may prevent some Ph.D. students from serving as teaching assistants.

Research Assistantships

Research assistantships are funded through research grants and contracts in the department and are awarded with the approval of the project leader for each grant.

Extension Assistantships

Extension assistantships are available as part of the extension programs in agricultural engineering. They are awarded with the approval of the project leader for each grant.

Responsibilities

Graduate students with assistantships are employees of the department. Thus, a graduate student must fully understand his/her dual role—that of a student and that of an employee. The assistantship is provided to the student for work to be performed. It is not a scholarship

to go to school or to write a thesis or dissertation. In some instances, the project work may not relate to the thesis/dissertation topic. The terms of a graduate assistantship is one-half time requiring 20 hours of work per week and full-time enrollment each semester; 9 hours in fall and spring, 3 hours each summer session or 6 hours for the 10-week summer session.

Graduate Scholarships

A limited number of competitive departmental scholarships will be awarded to graduate students each year depending on the availability of funds. The BAEN graduate advising office will send out calls for applications (prior to the beginning of fall and/or spring semesters) and the BAEN Graduate Program and Recruiting Committee will select the recipients through a competitive selection process.

International Students

Following are some general procedures for you to proceed smoothly with your education at Texas A&M University. More detailed information can be obtained by contacting the specific university services. The Texas A&M University Office of International Student Services will be an excellent source of helpful and important information and support throughout your academic career. You are encouraged to carefully review the website to learn of all the resources available to you at <http://iss.tamu.edu/>.

Things to Do Before Arriving On Campus

1. Visa— Once you have received an official letter of admission from the university, you need to contact the U.S. Embassy or Consulate in your home country near you to determine what things you need to do in order to apply for a visa. Upon arrival to the U.S., you will be asked to present your I-20, a valid visa and other pertinent documents to the immigration officer.
2. Housing—for information about housing options, go to <https://reslife.tamu.edu/options/>
3. Initial Expenses—Students should bring about US \$5,000 in funds which can be used immediately for resettling costs (apartment rent, deposits, utilities, and telephone), for opening your bank account and for establishing your household. If you bring bank or personal checks, allow for two weeks processing time at the bank before you will be able to use the money. This is very important because typically all of a student's tuition and fees are due before classes begin each semester.

Educational expenses for nine months will vary according to your personal needs and course of study. The Financial Aid Office's basic budget for new graduate students includes tuition and fees, books, supplies, transportation, room and board, incidental, and living expenses. Total expenses for returning students during an academic year should be slightly less than those for new students. For the latest and detailed tuition and fee information, please refer to <http://sfs.tamu.edu>.

The University offers very few scholarships to new international students. However, there are several scholarships available and administered through International Student Services (ISS) as well as financial assistance information at <http://iss.tamu.edu/Prospective-Students/Scholarships-Financial>

4. Health Insurance—Health insurance is required for all international students enrolled at Texas A&M University. Additional information about this requirement can be found at <http://iss.tamu.edu/Prospective-Students/Health-Insurance>. It is ultimately the student's responsibility to show proof of insurance.

Other Important Items

English Language Proficiency:

All international students whose native language is not English must fulfill an English proficiency requirement before gaining admission to Texas A&M University. Verification can be met in a variety of ways. For details on requirements visit <http://ogaps.tamu.edu/New-Current-Students/English-Language-Proficiency>.

Students who will be serving as Graduate Assistants Teaching (GAT) must be English Language *Certified*. Certification can be achieved in a variety of ways. For details on requirements visit <http://ogaps.tamu.edu/New-Current-Students/English-Language-Proficiency/English-Language-Proficiency-Certification>

Courses Registration—How and When?—Who Can Help? Your major professor will make recommendations for your first semester courses. Registration is done after you have checked in with ISS and resolved any additional registration holds on a student's file. Pay close attention to tuition payment due dates.

Payroll and Financial Aid - If you are given an assistantship, you should immediately see the Business Manager to start paper work promptly. You will be requested to attend an Orientation session at the Human Resources Office.

Other sources of financial aid are available for students. Details can be found at <https://scholarships.tamu.edu/>. The BAEN department encourages all students to visit the departmental website which also contains information regarding funding opportunities <https://baen.tamu.edu/academics/graduates/>.

Orientation - The International Students Service organizes several orientation sessions to give you information about the University policies, student identification card and other issues (social security card, maintaining legal U.S. immigration status, income tax procedures, international students who are looking for other international roommates, second hand cars and furniture, etc.). It is highly encouraged that all incoming international students attend an orientation provided by ISS. The Office of Graduate and Professional Studies also provides an incoming student orientation that can be very helpful to new students.

Texas driver's license or ID - You should get either a Texas driver's license or a Texas ID. Either document is used in many kinds of daily transactions and activities such as paying by check or as an identity card. It is not safe to walk around with your passport! You should go to the local Texas Department of Public Safety (DPS), 2571 N. Earl Rudder Fwy., Bryan TX 77803, 979-776-3110 (phone).

Appendix

This appendix is to be used as a guide and the information is subject to change; please consult with the graduate academic advisor for the most up to date information.

Appendix A – Degree Requirements: Quick Reference

Master of Science in BAEN Degree Requirements (thesis option)

Course	Number of Courses	Total Credit Hours
BAEN 681: Seminar	1	1
BAEN 690: Theory of Research	1	1
BAEN 683: Peer Review Process and Publication	1	1
BAEN 691: Research	***	8**
BAEN Elective courses	2	6
MATH Elective	1	3 - 4
STAT Elective	1	3 - 4
Free Electives	***	7 - 9
Total Hours		32**

****Students entering the department beginning Fall 2019 will be placed on a 30 hour degree program requiring no more than 6 hours of research credits.**

**Must choose MATH and STAT elective from approved course list. See reference list. Student can only have a maximum of 6 hours of 685 and 689 combined coursework on graduate degree plan. Maximum of 9 hours of undergraduate credit at the 300-400 level may be used on a graduate degree plan. None of the BAEN undergraduate required courses may be used on a graduate degree plan. Student may only apply a maximum of 12 hours of transfer coursework to a graduate degree plan. Final oral defense of thesis required.*

Master of Science in AGSM Degree Requirements (thesis option)

Course	Number of Courses	Total Credit Hours
BAEN 681: Seminar	1	1
BAEN 690: Theory of Research	1	1
BAEN 683: Peer Review Process and Publication	1	1
BAEN 691: Research	***	8
BAEN Elective courses	2	6
BAEN 601: Advanced Agricultural Systems Analysis	1	3
STAT Elective	1	3 - 4
Free Electives	***	8 - 9
Total Hours		32

**Must choose STAT elective from approved course list. See reference list. Student can only have a maximum of 6 hours of 685 and 689 combined coursework on graduate degree plan. Maximum of 9 hours of undergraduate credit at the 300-400 level may be used on a graduate degree plan. None of the AGSM undergraduate required courses may be used on a graduate degree plan. Student may only apply a maximum of 12 hours of transfer coursework to a graduate degree plan. Final oral defense of thesis required.*

Master of Science in AGSM Degree Requirements (non-thesis option)

Course	Number of Courses	Total Credit Hours
BAEN 681: Seminar	1	1
BAEN Elective courses	2	6
BAEN 601: Advanced Agricultural Systems Analysis	1	3
Free Electives	***	26
Total Hours		36

** Student can only have a maximum of 6 hours of 685 and 689 combined coursework on graduate degree plan. Maximum of 9 hours of undergraduate credit at the 300-400 level may be used on a graduate degree plan. None of the AGSM undergraduate required courses may be used on a graduate degree plan. Student may only apply a maximum of 12 hours of transfer coursework to a graduate degree plan.*

Master of Engineering in BAEN Degree Requirements

Course	Number of Courses	Total Credit Hours
BAEN 681: Seminar	1	1
BAEN 684: Professional Internship	***	3 - 6
BAEN Elective courses	2	6
MATH Elective	1	3 - 4
Free Electives	***	13 - 17
Total Hours		30

**Must choose MATH elective from approved course list. See reference list. Student can only have a maximum of 6 hours of 685 coursework on graduate degree plan. Any combination of 684 and 685 cannot exceed 25% of total hours. Maximum of 9 hours of undergraduate credit at the 300-400 level may be used on a graduate degree plan. None of the BAEN undergraduate required courses may be used on a graduate degree plan. Student may only apply a maximum of 12 hours of transfer coursework to a graduate degree plan. Final oral examination over written internship report required.*

Master of Agriculture in AGSM Degree Requirements

Course	Number of Courses	Total Credit Hours
BAEN 681: Seminar	1	1
BAEN 684: Professional Internship	***	8
BAEN Elective courses	***	9
Free Electives	***	18
Total Hours		36

* Student can only have a maximum of 8 hours 685 coursework on graduate degree plan. Any combination of 684, 685, 683 and 690 may not exceed 25% of program. Maximum of 9 hours of undergraduate credit at the 300-400 level may be used on a graduate degree plan. None of the AGSM undergraduate required courses may be used on a graduate degree plan. Student may only apply a maximum of 12 hours of transfer coursework to a graduate degree plan. Final oral examination over written internship report required.

Doctorate of Philosophy in BAEN Degree Requirements (96 credit hour option) – students with no MS degree

Course	Number of Courses	Total Credit Hours
BAEN 681: Seminar	1	1
BAEN 690: Theory of Research	1	1
BAEN 683: Peer Review Process and Publication	1	1
BAEN 691: Research	***	60
BAEN Elective courses	2	6
MATH Elective	1	3 - 4
STAT Elective	1	3 - 4
Free Electives	***	19 - 21
Total Hours		96

**Must choose MATH and STAT elective from approved course list. See reference list. Student can only have a maximum of 3 hours of 685 coursework on graduate degree plan. Student must complete preliminary examination (written and oral). Final oral defense of dissertation required.*

Doctorate of Philosophy in BAEN Degree Requirements (64 credit hour option) – students with a MS degree

Course	Number of Courses	Total Credit Hours
BAEN 681: Seminar	1	1
BAEN 690: Theory of Research	1	1
BAEN 683: Peer Review Process and Publication	1	1
BAEN 691: Research	***	40
BAEN Elective courses	2	6
MATH Elective	1	3 - 4
STAT Elective	1	3 - 4
Free Electives	***	7 - 9
Total Hours		64

**Must choose MATH and STAT elective from approved course list. See reference list. Student can only have a maximum of 3 hours of 685 coursework on graduate degree plan. MATH and STAT requirement can be waived if student obtained a grade of B or better in an approved course while obtaining MS degree. Student must complete preliminary examination (written and oral). Final oral defense of dissertation required. Student who obtained MS degree in department and satisfactorily completed BAEN 690 does not have to retake course.*

Master of Science in AGSM Degree Requirements DISTANCE – food emphasis sample

Course	Number of Courses	Total Credit Hours
BAEN 625: Advances in Food Eng	1	3
AGSM 685: Special Topics	1	3
Nanotechnology Food Proc	1	3
Shelf life Princ and Apps	1	3
BAEN 662: Unit Operation in Food Proc.	1	3
BAEN 601: Advanced Agri Sys Analysis	1	3
BAEN 627: Engr Aspects Food Pkg	1	3
BAEN 620: Food Rheology	1	3
STAT Elective	1	3 - 4
Food Science or Free Electives	***	9
Total Hours		36 - 37

**Must choose STAT elective from approved course list. See reference list. Student can only have a maximum of 6 hours of 685 and 689 combined coursework on graduate degree plan. Maximum of 9 hours of undergraduate credit at the 300-400 level may be used on a graduate degree plan. None of the AGSM undergraduate required courses may be used on a graduate degree plan. Student may only apply a maximum of 12 hours of transfer coursework to a graduate degree plan. Final oral defense of thesis required.*

Master of Science in AGSM Degree Requirements DISTANCE – general

Course	Number of Courses	Total Credit Hours
BAEN 601: Advanced Agri Sys Analysis	1	3
STAT Elective	1	3 - 4
Free Electives	***	29-30
Total Hours		36

**Must choose STAT elective from approved course list. See reference list. Student can only have a maximum of 6 hours of 685 and 689 combined coursework on graduate degree plan. Appendix B – Sample Internship Documentation Form

(This form must be completed and returned to BAEN Graduate Advising Office before leaving for internship)

Student Information
Student name:
UIN:
Major:
Internship Information
Company/organization name:
Supervisor name and contact information:
Company/organization location:
Hours planned per week:
Length of internship (weeks):
Semester/year of internship:
Topic:
Objectives:
Student Signature: _____
Faculty Signature: _____

Appendix C – Annual PhD Student Progress Form

Biological and Agricultural Engineering (BAEN)

Department

Annual Ph.D. Student Progress Form

Return to BAEN Graduate Office by May 01 Annually

(Note: Failure to turn this in by the deadline will result in an academic registration hold)

1. (To be completed by the student)

Student Name: _____ ID Number: _____

Email Address: _____ Phone: _____

Date of First Enrollment in the PhD Program (semester/year) _____

Expected date of defense (semester/year) _____

Graduate Credit Hours completed during PhD study at Texas A&M: _____ CGPA: _____

Name of the Committee Chair: _____

Co-Chair: _____

Milestones Completed

Dissertation/Advisory Committee Formed _____ (date)

Members: _____

Dissertation Proposal Title: _____

Oral Prelim Exam

Date Taken _____ Passed ___ Failed ___ (First try)

Date Taken _____ Passed ___ Failed ___ (Second try if necessary)

Advanced to Candidacy (Date) _____

2. (To be completed by the student)

Main Area of Research / Interest: _____

Progress Summary

Please write a short summary of your progress in the PhD Program over the past 12 months. Include accomplishments such as papers submitted or accepted, conferences attended, honors and awards, or any other significant event(s). You should also mention any problems in making progress on your degree.

3. (To be completed by the Committee Chair)

Overall progress (check)

Satisfactory: _____ Needs Improvement: _____ Unsatisfactory: _____

Remarks (use this space to set goals for upcoming year, elaborate unsatisfactory performance etc.

Signature of Student: _____

Signature of Committee Chair: _____

Appendix D – Sample Manuscript Tracking Form

This form must be completed and submitted with the Written Dissertation Approval Form when obtaining Department Head signature. PhD level – the expectation is two submitted manuscripts
