

Seminar

Plant Pathology & Microbiology

PLP
TEXAS A&M UNIVERSITY

Wednesday

November 18, 2015

Peterson 113

4:00 PM—5:00 PM

Dr. Brett Tyler

Professor, and Director, Center for
Genome Research and Biocomputing

*Department of Botany and Plant
Pathology | Oregon State University*

How oomycete effectors enter host cells and modulate plant immunity

Much of the Tyler group's research is focused on the systems biology of microbe-host interactions, with a focus on the interactions of oomycete pathogens with their hosts. This research spans molecular biology, structural and functional genomics, bioinformatics, data mining and mathematical modeling.

Hosted by Dr. Libo Shan

Coffee & Cookies

3:45 - 4:00 Room 121
