Ketchikan, AK 99901

**EXPERIENCE SUMMARY**

Lisa Murphy has over 32 years of experience in regulatory permitting and compliance for multiple industry and public sector clients. She owned and operated Hill Country Environmental, Inc. (HCE) from its inception in 1992 until its acquisition in 2015. During this time, she provided project management and engineering for all HCE projects. Ms. Murphy has significant experience in all areas of environmental permitting and compliance, and she specializes in providing risk management and permitting strategies for developing projects. Prior to founding HCE, Ms. Murphy worked as an air permitting project manager for Environmental Consulting Associates for two years and as a staff engineer and hydrologist at the Texas Commission on Environmental Quality's predecessor agency for seven years where she performed water quality modeling / permitting and RCRA permitting.

PRIMARY PRACTICE AREAS

New project development	Risk management and permitting strategies for new projects and expansions, including due diligence preparation and environmental permitting applicability determination; budget development for financial model and input to project schedule
Expert witness and litigation support services	Areas include water, waste and air permitting and compliance; representation at public hearings and meetings; case development and strategy
Regulatory enforcement support	Any environmental compliance matter at a federal, state or local level
Environmental, health & safety management systems	Assistance with evaluation and implementation of available systems or coordination of development of a new system
Technical and application writing	Experience with US Department of Energy loan guarantee applications, State grant applications, applications for all types of permitting, user's manuals and procedures
Business operations management	Culture-specific solutions and procedures to generate efficient and sustainable operational practices for any type of professional services business
