- Chungnam National University
- College of Humanities
- Department of Chinese Language & Literature

- ▶ Ph.D., Peking(Beijing) University
- ▶ M.A., Peking(Beijing) University
- ▶ B.A., Chungnam National University

Invited Instructor

Xu Chang

- Shandong University
- School of History and Culture
- Chinese Histor

- ▶ Ph.D., History, Nanjing University
- ▶ M.A., History, Shandong University
- ▶ B.A., History, Shandong University

03 Special Topics on Sociology

Language English

Course Description

This introductory course to sociology deals with diverse contemporary issues of Korean society through the lens of "sociological imagination." Sociological imagination, the capacity of seeing the relationship between personal experience and the wider society, gives a unique perspective to understanding social phenomena in relation to personal and historical contexts. The issues covered in this course include globalization, population, environment, inequality, gender, marriage/family, race/ethnicity etc., and students will have a chance to navigate through these important social dimensions in the context of Korean society from a comparative perspective. The primary mode of learning is to be lectures and in-class discussion, and all participants are expected to contribute to class with their own sociological imagination.

Instructor

Hwang Sun Jae

- Chungnam National University
- College of Social Science
- Department of Sociology

- ▶ Ph.D., Sociology, University of Michigan, Ann Arbor
- ▶ M.A., Sociology, University of Michigan, Ann Arbor
- ▶ B.A., Sociology, Yonsei University

Language English

Course Description

This course provides an introduction to the concepts and theories of psychology and to their application to real life situations. The major topics to be covered will include consciousness, sensation, memory, learning, development, personality, stress and health, psychological disorders, and treatment of psychological disorders. The format of class will be that of a lecture course with occasional media presentations and in-class activities.

Host Instructor

Kim Ju Eun

- Chungnam National University
- College of Social Science
- Department of Psychology

- ▶ Ph.D., Clinical Psychology, Syracuse University
- ▶ M.Soc., Clinical Psychology, Columbia University, NY
- ▶ B.Soc., Counseling & English, Handong University

Invited Instructor

Park Ae Soon

- Syracuse University
- College of Arts and Science
- Department of Psychology

- ▶ Ph.D., Clinical Psychology, University of Missouri-Columbia
- ▶ M.Soc., Clinical Psychology, Korea University
- ▶ B.A., Japanese Language & Literature, Korea University

06 Big Data

Language English

Course Description

This course will enable students to learn the concepts of big data based on a comprehensive understanding of various information technologies and infrastructures in the era of the Fourth Industrial Revolution. Students discuss information strategies and techniques for big data collection, analysis and application, project management, and human behavior to use and share big data in a social context. Students participate in class activities and projects to apply the knowledge learned in class to the practice.

Host Instructor

Oh Sang Hee

- Chungnam National University
- College of Social Science
- Department of Library & Information Science

- ▶ Ph.D., Information Science, University of North Carolina, Chapel Hill
- ▶ M.L.I.S, Library and Information Science, University of California at Los Angeles
- ▶ B.A., Library and Information Science, Seoul Women's University

Invited Instructor

Syn Sue Yeon

- Catholic University of America
- School of Arts and Sciences
- Department of Library and Information Science

- ▶ Ph.D., Information Science, University of Pittsburgh
- ▶ M.S., Information Science, University of Library and Information Sciences, Tsukuba, Japan
- ▶ B.A., Library and Information Science & Minor, English Language and Literature, Ewha Womans University

07 Introduction to Statistics

Language English

Course Description

The course aims to help you to understand the world from data. Specifically, you will learn how to incorporate the statistical thinking into your daily life, gather the data, analyze and interpret the data. The course covers descriptive and graphic summaries of the data, basic probability and distributions, and statistical inference. Interesting examples will be discussed to show how statistical methods are applied in various fields, and decisions are made based on the analysis results. In the big data era, to enable scalable data analysis, statistical computing is now emphasized more than ever. The R software will be intensively used to conduct statistical analysis.

Host Instructor

Lee Eun Jee

- Chungnam National University
- College of Natural Sciences
- Department of Information & Statistics

- ▶ Ph.D., Statistics, University of North Carolina, Chapel Hill
- ▶ M.S., Statistics, Korea University
- ▶ B.S., Statistics, Korea University

Invited Instructor

Ahn Mi Hye

- University of Nevada, Reno
- Department of Mathematics & Statistics
- Department of Mathematics & Statistics

- ▶ Ph.D., Statistics, North Carolina State University, Raleigh, NC
- ▶ M.S., Statistics, Inha University
- ▶ B.S., Statistics, Inha University

08 Geospatial Information Sciences and Geostatistics

Language English

Course Description

The course is an introductory course for general majors to get familiar with Geographic Information Systems and web-based GIS. It combines lectures with a substantial practical component. The lectures cover the nature of geospatial data, spatial data models, technical issues in GIS data acquisition, data storage and retrieval, data visualization, and web-GIS. Half of the lectures will deal with training in real-world data using the open-source GIS software(QGIS). The practical component will give students hands-on experience in using proprietary GIS software packages to handle geospatial information.

Host Instructor

Yu Jae Hyung

- Chungnam National University
- College of Natural Sciences
- Department of Geopogical Sciences Statistics

- ▶ Ph.D., Remote Sensing & GIS, Texas A&M University
- ▶ M.S., Economic Geology & Geochemistry, Chungnam National University
- ▶ B.S., Geology, Chungnam National University

Invited Instructor

Lei Wang

- Louisiana State University
- Department of Geopography and Anthropology
- Department of Psychology

- ▶ Ph.D., Geography, Texas A&M University
- ▶ M.S., Science, IRSA, Chinese Academy of Science, China
- ▶ B.S., Science, Peking(Beijing) University

09 Global Marketing

Language English

Course Description

It has more important to understand and develop knowledge, sensitivity and skills needed to do business in a dynamic global market. This course will create a wide knowledge on a number of major ideas that are associated with global marketing and international business. In specific, the following themes are included: globalization, cultural and societal environment, trade theory, government in international business, entry modes, economic integration, emerging markets, financial institutions, marketing and management strategy, etc.

Host Instructor

Cho Hyuk Soo

- Chungnam National University
- College of Economic & Management
- Department of International Trade

- ▶ Ph.D., International Business, Washington State University
- ▶ M.B.A., Washington State University
- ▶ B.A., International Trade, Keimyung University

Invited Instructor

Kim Sang Kyun

- Sungkyunkwan University
- SKK Business School
- Department of Organisation & Human Resources

- ▶ Ph.D., Strategic Management, Washington State University
- ▶ M.B.A., Washington State University.
- ▶ B.A., Statistics, Keimyung University

10 Environmental Microbiology in Agriculture

Language English

Course Description

This course will introduce students to the field of microbiology involved in agriculture and environment. This lecture will focus on

- Understand microorganisms in agriculture and natural environment including microbial distribution, diversity, ecology and function
- Understand concepts and current topics in plant-microbe interactions including beneficial microorganisms
- Understand the types of microorganisms related to environmental pollution and the analyzing tools.

Host Instructor

Yu Jun Myoung

- Chungnam National University
- College of Agriculture & Lifescience
- Department of Applied Biology

- ▶ Ph.D., Plant Pathology & Microbiology, Texas A&M University
- ▶ M.S., Crop Sciences, Plant Pathology Program, University of Illinois
- ▶ B.S., Agronomy, Iowa State University National University

Invited Instructor

Shim Won Bo

- Texas A&M University
- College of Agriculture and Life Sciences
- Department of Plant Pathology & Microbiology

- ▶ Ph.D., Plant Pathology, Purdue University, Indiana
- ▶ M.S., Plant Pathology, Seoul National University
- ▶ B.S., Agricultural Biology, Seoul National University

11 Molecular Biology

Language English

Course Description

Culture and Art-Making Study In this course, culture will not be taught but rather shared and experienced together utilizing new application of technology. This course is an introspective as well as across-cultural comparative study of what inspires and influences as creators. The class is conducted in roundtable format.

Individually, students will share the ironartistic interests and influences across a variety of Korean-culture & Film and then determine what factors shapes one's value and aesthetics.

What wil lbe Zeitgeist of this generation?

Host Instructor

Kim Joon Yup

- Chungnam National University
- College of Agriculture & Lifescience
- Department of Horticultural Science

- ▶ Ph.D., Philosophy, Chungnam National University
- ▶ M.A., Philosophy, Chungnam National University
- ▶ B.A., English Language & Literature, Chungnam National University

Invited Instructor

Sung Si Bum

- University of Texas at Austin
- Institute for Cellular & Molecular Biology
- Department of Molecular Biosciences

- ▶ Ph.D., Biochemistry, University of Wisconsin-Madison
- ▶ M.S., Biology, Seoul National University
- ▶ B.S., Biology, Seoul National University

12 Korean I

Language Korean

Course Description

The curriculum aims to enable international students to speak, listen, read and write Korean. For this purpose, they will learn Korean consonants and practice basic expressions necessary for daily life to understand Korean culture as well as communicate in Korean.

It teaches basic Korean such as Korean alphabet, basic writing style, and vocabular. Also this class encourages students to participate with interest by providing feedback after fully practicing what they have learned.
